

PUTU ARDI SUDARMIKA

Software Engineer | Full Stack Web Developer

Bali, Indonesia, 81152 | +62 852-3892-9492 | ardisudarmika94@gmail.com | [LinkedIn](#) | [GitHub](#)

PERSONAL PROFILE

I am a recent Computer Science graduate from Udayana University (GPA 3.88/4.0) with hands-on experience across the full web development stack, from backend logic and database design using Django, Laravel, and Flask to responsive, user-focused frontend interfaces built with JavaScript, React.js, and Vue.js. For my undergraduate thesis, I developed SariKidung, an ontology-based knowledge management system for Balinese Kidung integrating a rule-based recommendation engine, a Decision Tree (CART) model, and a chatbot. I have also delivered multiple production-style systems through internships and freelance work, including navigation platforms and employee management systems. Comfortable working in remote, cross-functional teams, I am eager to grow as a software engineer who builds reliable, data-informed applications end to end.

EDUCATION

Udayana University – Badung, Bali, Indonesia

Graduated: 2026

Bachelor of Computer Science GPA: 3.88 / 4.0

PROFESSIONAL EXPERIENCE

Platform and Web Developer (Specialist Education Platform) – Internship

Sep 2022 – Dec 2022

PT Maleo Edukasi Teknologi – Tangerang Selatan, Indonesia (Remote)

- Developed a web-based office routing and navigation system using Django, including interactive maps, route guidance, and location search across rooms, departments, and facilities
- Implemented backend logic with Python and Django ORM, and built the frontend interface with HTML, CSS, and JavaScript
- Designed and managed the database structure for location and routing data
- Collaborated with the team to test, refine, and deploy features that improved the navigation experience for visitors and staff

Web Developer – Academic Internship

Mar 2024 - August 2024

Faculty of Math & Natural Sciences, Udayana University – Bali, Indonesia

- Developed a web-based employee management system using Laravel, covering employee data, document management, and administrative workflows
- Built backend logic and user interfaces, and managed database structure and system integration
- Worked directly with faculty staff to gather requirements, test the system, and refine features based on real operational needs

Junior Data Science – Internship

Feb 2025 – Jun 2025

PT. Vinix Seven Aurum – Yogyakarta, Indonesia (Remote)

- Assist in data collection, cleaning, and preprocessing for various machine learning projects
- Contribute to the development and evaluation of predictive models using Python and popular ML libraries
- Support the team in extracting insights from complex datasets through statistical analysis and visualization
- Collaborate with cross-functional teams to implement data-driven solutions
- Participate in regular meetings to discuss project progress and results

Founder & Web Developer – Freelance

Present

- Design and develop websites and UI/UX solutions for clients as founder of ardee.dev
- Design client branding and logos, and provide technical and academic project assistance alongside web development work
- Worked on data analysis and data visualization projects

PROJECTS

- **SariKidung Knowledge Management System for Balinese Kidung:** Flask, Python, OWL Ontology, Owlready2, Decision Tree (CART), Rule-Based System, SQLite, HTML, CSS, JavaScript, Bootstrap. Developed a knowledge management system integrating ontology, rule-based recommendation, Decision Tree (CART), and LLM chatbot (SariBot) for interactive Kidung information access.
- **GObat: WebApps Diagnosa 41 Jenis Penyakit Beserta Rekomendasi Pengobatan:** Utilized Random Forest algorithm integrated with a health consultation chatbot based on LLM (Large Language Model).
- **Website Office Route:** Developed a web-based system to simplify office routing and navigation.
- **Perancangan dan pengembangan sistem informasi kepegawaian dan administrasi pegawai (SIKAP):** Designed and developed an information system for employee administration and management.
- **Website Sistem Manajemen Ruangan dan Tempat untuk Event Kampus (SIMRATEK):** Designed and developed a room and venue management system for campus events.
- **Website Sistem Rekomendasi Ruangan Menggunakan Content-Based Filtering dan Face Recognition:** Built a room recommendation system using content-based filtering and face recognition technology.
- **Peduli Hijau Website:** Developed an environmentally-focused website using JavaScript to promote green initiatives and awareness.
- **Website Himaif:** Created a website for the Informatics Student Association to support organizational activities and communication.
- **Data Structure Using Floyd-Warshall Algorithm:** Employed the Floyd-Warshall algorithm to analyze data structures and find the shortest path in a graph.
- **OOPPBO E-commerce Application:** Leveraged Object-Oriented Programming concepts to develop a complex e-commerce application.
- **CYK Parsing Applying CFG in Syntactic Analysis:** Used Python to implement CYK parsing in syntactic analysis with Context-Free Grammar (CFG).
- **Algorithm Design Analysis Program:** Created a program using Java to analyze and design algorithms with various optimization techniques.
- **Vending Machine Simulation System:** Simulated the operations of a vending machine using Finite State Machine (FSM) and Python.
- **Text Classification for Emotion Classification in Twitter Data:** Applied text classification techniques to categorize emotions in Twitter data.
- **Sistem Rekomendasi Genre Musik Berbasis Konten:** Developed a content-based music genre recommendation system.
- **Stack Programming Project:** Implemented stack data structures using multiple programming languages.
- **Email Sender Program:** Developed a program to automate email sending using a programming language.
- **Quiz Website:** Employed HTML, CSS, and JavaScript to build an interactive quiz website.
- **Portfolio Website:** Utilized HTML, Bootstrap, and JavaScript to create a responsive personal portfolio website.

ORGANIZATIONAL EXPERIENCE

HIMAIF, Udayana University — Student Welfare Division

2022 – 2025

Organized national webinars and led recruitment and management of student representatives and cohorts.

Google Developer Student Club (GDSC) Udayana — Community Staff	2023 – 2024
Managed internal member communications and contributed to three major community events.	
Student Council (OSIS) SMA Negeri 1 Banjar - Vice Chairman	2019 – 2022
Co-led the student council and coordinated multiple school-wide events and programs.	
District Scout Council (Dewan Kerja Ranting) Banjar — Chairman	2019 - 2022
Led scouting programs, training camps, and community activities across the district.	

SKILL

- **Programming Languages:** C, C++,Python, PHP, Java, Pascal, JavaScript
- **Frontend Development:** HTML, CSS, JavaScript, React.js, Vue.js
- **Backend Development:** Django, Laravel, REST APIs, Flask
- **Database:** MySQL, SQLite
- **Knowledge Representation:** OWL, Ontology Engineering, SPARQL
- **UI/UX Design:** Figma, Adobe Photoshop, Canva
- **Data & Machine Learning:** Data cleaning & preprocessing, statistical analysis, predictive modeling, data visualization
- **Tools & Technologies:** Git, GitHub, Visual Studio Code, Apache NetBeans, Microsoft Office (Word, Excel, PowerPoint, Visio), Mendeley, Trello
- **Soft Skill:** Problem Solving, Analytical Thinking, Critical Thinking, Teamwork, Communication, Continuous Learning, Leadership
- **Communication & Collaboration:** Zoom, Google Meet, Webex

AWARDS

- Best Performance Award, STACK — SIC Tech Talk and Practice, Student Innovation Centre (2023)
- Finalist, National Data Science Tournament (2024)
- 3rd Place, PKM-KC (Student Creativity Program – Karsa Cipta) (2024)
- Golden Ticket Award, MSIB Batch 7 — PT Maleo Edukasi Teknologi (2024)
- International STEM Support Certificate (2024)
